

## 15% Off Spring Sale!

**Call AK Timber before April 1st to get 15% off your Tree Service!**

***Call now to get your appointment scheduled!***

Spring is just around the corner, and there's no better time to get started on tree pruning and maintenance!

Our tree specialists have the knowledge to develop and keep your trees living a long healthy and beautiful life. Proper trimming (tree pruning) is one of the best things you can do for your tree throughout its lifetime. When pruning is done at the wrong time in the tree's growth cycle or at improper locations along branches, it may cause more damage than good.

Our professional arborists are trained in proper tree pruning techniques to prevent this from happening and to remedy situations that may result in poor tree health.

Spring is here and now is the time to get started!
